rivas by ICI

Better project information flow;
so you achieve decisions *faster.*

THE RIVAS SOLUTION

SOFTWARE LICENSE

ReportViz and **Document Manager** are the core of RIVAS. A scalable annual license grows with your project along with purposeful modules as you need them.

IMPLEMENTATION

With decades of experience spanning hundreds of projects, our multidisciplinary team will deploy your configured system rapidly.
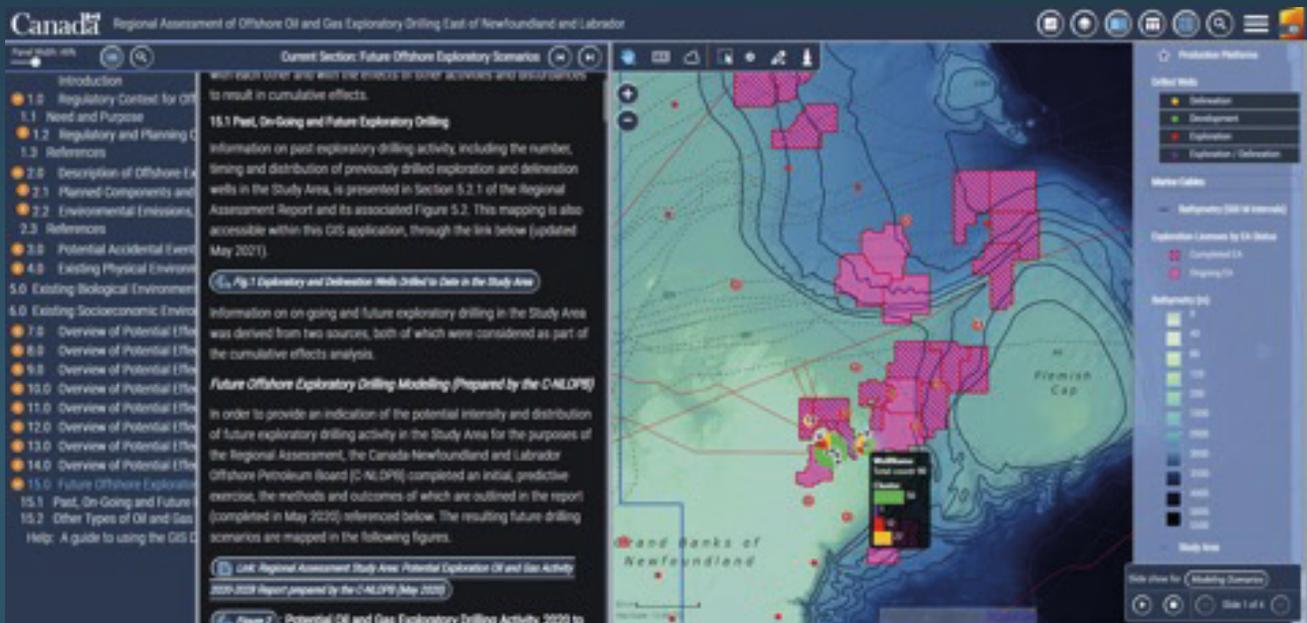

SUPPORT SERVICES

We're there for the duration. Project Managers, Developers, Practitioners, Consulting Scientists and Product Managers to support your project and augment your team when needed.

in-**Form**

Purpose-built to be **flexible, scalable** and **configurable** to the needs of your project stage whether at Planning and Design, Permitting, Construction and Operation, or Decommissioning.

Since 2014 ICI Innovations has implemented custom Interactive Data Visualization and Reporting solutions for Government, NGOs and Industry alike. Along the way we developed expertise, tools, procedures and custom user-interfaces leveraging existing technology and platforms. This evolved into **RIVAS – our project information management system.**

OIL AND GAS – REGIONAL ASSESSMENT

reportVIZ

- **Core module – visualization**
- **Planning and Design stage**
- **Reports, maps, data access**
- **Review all data in context**

document Manager

- **Core module – information**
- **Planning and Design stage**
- **Upload - manage - access**
- **Integrated search and download**

engagement Manager

- **Enter engagements directly**
- **Implement once engagement begins**
- **Track issues, tasks and status**
- **Visual integration via ReportVIZ**
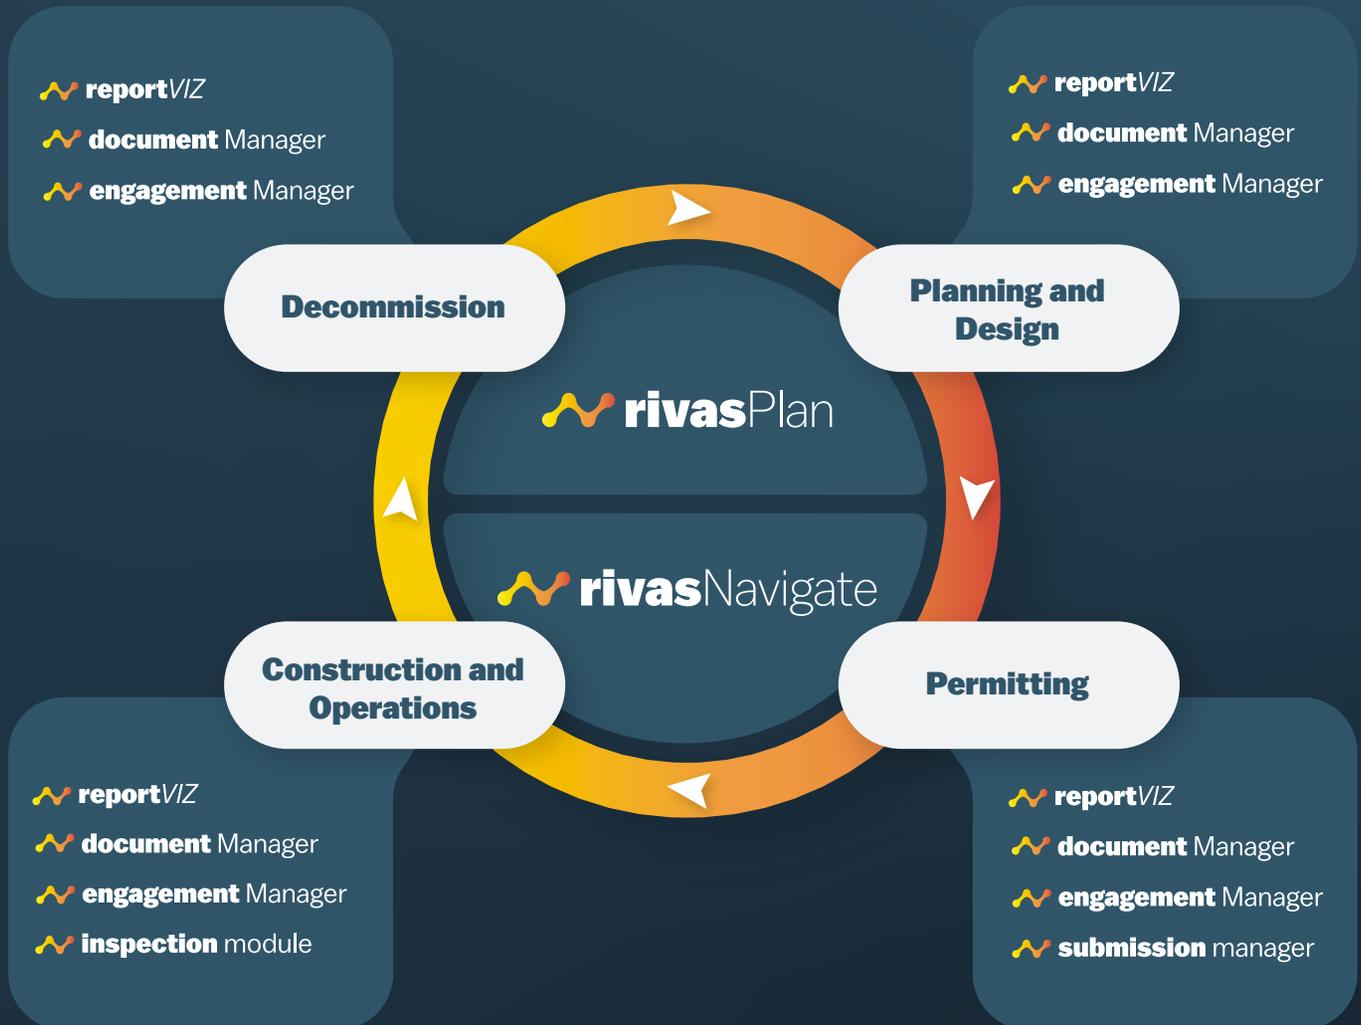

supplier Registration

- **Add-on Module – manage information**
- **Implement once suppliers required**
- **External information upload**
- **Integrated data management**

Right Information – to the Right Person – at the Right Time

Smooth the decision-making process. Preparation is the key to making an impact by being thorough, responsive and transparent. Providing this level of access builds trust.

Secure – Stable – Scalable

RIVAS software leverages MS 365 to define and manage project access, roles and communication (MS Teams), data and document management (SharePoint) and connections with back-end systems (Azure, AWS). Known systems to IT departments with interfaces that are familiar to end-users and trusted by management. All of which are key to successful system and project integration.
